To Process Your Order in a Timely Manner, the Plans, Application Form and Payment Must Be Sent Together!

IF NOT, EXPECT DELAYS!

energywise™

Residential Energy Analysis Fees:	0 to 2,999 square foot	= \$600.00
	3,000 square foot to 4,999 square foot	= \$800.00
	5,000 square foot to 6,999 square foot	= \$1000.00
	For every additional 2,000 square feet, add	= \$200.00
Because of the complexity of the plans for three or more levels, add		= \$200.00 to the total

Additional Services:

- _____ Add a mechanical layout to my total.
- _____ Please rush my plans for an additional \$35 fee (three business day turnaround from the date that we receive them)
- _____ I will e-mail my plans, and I understand there is an additional \$20 fee for in-house printing.

All residential mechanical drawings are engineered and overseen by Michael R. Busby, Ph.D, PE, starting at \$ 0.15 per square foot of heated and cooled area. Residential plans are not normally stamped* and are drawn by hand. If you would like to have them drawn in Auto-CAD and stamped, we can do that for an additional fee.

- We are not registered in all 50 states, and we can only stamp plans in states in which we are registered. If an energywise™ dealer generates enough business in a state where we are not yet registered, energywise™ will, at our expense, go through reciprocity to obtain registration in that state.

Your energywise™ Plan Check List:

1. Set of Floor Plans, Elevations and Electrical (including door and window sizes)
2. Residential Application Filled-Out
3. Payment Arrangements

Make all checks payable to: energywise™ Structures
